LinkedIn: <https://www.linkedin.com/in/joe-choe-a97b52237/>

Grounded and solution-oriented aspiring full-stack web-developer with experience in HTML, CSS, JavaScript, Bootstrap, Node.js

## Projects

---

### WikiLeeks Recipe Generator

- The purpose of this web application was to utilize two external APIS in order to generate randomized recipes based on the user's preferences.
- This application curates recipes from different databases and contains a variety of feature implementations in order to tailor the recipe to the user's dietary preferences and/or restrictions.. A combination of HTML, JavaScript, CSS, JQuery, JSON were utilized to create this application and my main responsibility was to refactor some of the JavaScript code in addition to creating the project documentation.

### Password Generator

- The purpose of this web application was to generate a random secure password based on a set of selected criteria.
- HTML, CSS, and JavaScript were utilized to create this application and my responsibility was to modify starter code in order to have the generator fully functional and operational.

### Advanced CSS Portfolio

- The purpose of this web application was to create a portfolio webpage by utilizing foundational CSS concepts.
- HTML and CSS were primarily utilized and my responsibility was to implement CSS concepts in order to build a responsive, mobile-friendly portfolio web application.

## Education

---

**University of Washington**
